Share the Road

Research shows that 75% of motorcycle crashes involve four-wheeled vehicle. The key to a safer traffic mix is learning to share the road.

Passing

Give the motorcycle the lane area that you would give another vehicle.

Look for Motorcycles

Include motorcycles in your search pattern. Motorcycles are small and may be difficult to see. Some motorists are unaccustomed to seeing motorcycles in traffic.

Intersections

Intersections are most likely and most frequently the place for a motorcycle crash to occur.

Traffic Lane Area

Do not share the lane. To properly operate a motorcycle the entire lane is used.
